

Microsoft Azure

Microsoft Azure Compliance Offerings

Abstract

This document provides an overview of Microsoft Azure compliance offerings intended to help customers meet their own compliance obligations across regulated industries and markets worldwide. Azure maintains the largest compliance portfolio in the industry both in terms of breadth (total number of offerings), as well as depth (number of customer-facing services in assessment scope).

Overview

Azure is a multi-tenant hyperscale cloud platform that is available or announced to customers in 60+ [regions](#) worldwide. Most Azure services enable customers to specify the Region where their [Customer Data](#) will be [located](#). Microsoft may [replicate](#) Customer Data to other Regions within the same Geo for data resiliency but Microsoft will not replicate Customer Data outside the chosen Geo (e.g., United States). Microsoft makes 4 distinct Azure cloud environments available to customers:

- **Azure** public cloud service is available globally.
- **Azure in China** is available through a unique partnership between Microsoft and 21Vianet, one of the country's largest Internet providers.
- **Azure Government** is available from 3 regions in the United States to US government agencies and their partners.
- **Azure Government for DoD** is available from 2 regions in the United States to the US Department of Defense

To help customers meet their own compliance obligations across regulated industries and markets worldwide, Azure maintains the largest compliance portfolio in the industry both in terms of breadth (total number of offerings), as well as depth (number of [customer-facing services](#) in assessment scope). To find out which Azure services are available in which regions, customers should explore the Azure global infrastructure [product availability dashboard](#).

Azure compliance offerings are grouped into four segments: **globally applicable, US government, industry specific, and region/country specific**. Compliance offerings are based on various types of assurances, including formal certifications, attestations, validations, authorizations, and assessments produced by independent third-party auditing firms, as well as contractual amendments, self-assessments, and customer guidance documents produced by Microsoft.

- **Globally Applicable:** Compliance offerings in this segment have global applicability across regulated industries and markets. They can often be relied upon by customers when addressing specific industry and regional compliance obligations. For example, ISO 27001 certification provides a baseline set of requirements for many other international standards and regulations.
- **US Government:** Compliance offerings are focused primarily on addressing the needs of US Government. Azure, Azure Government, and Azure Government for DoD have the same comprehensive security controls in place, as well as the same Microsoft commitment on the safeguarding of Customer Data. Azure Government provides additional controls regarding US Government specific background screening requirements, including maintaining US persons for Azure Government operations. Azure Government for DoD is reserved for exclusive use by the Department of Defense.
- **Industry Specific:** Compliance offerings are intended to address the needs of customers subject to various industry regulations such as those in financial services, healthcare and life sciences, media and entertainment, education, etc. Azure is not subject directly to oversight by these regulators; however, Azure can help customers meet their own compliance requirements by

furnishing a variety of documents ranging from formal independent third-party assessments to guidance documentation and contractual commitments produced by Microsoft.

- **Region / Country Specific:** The compliance offerings are specific to various regional and country laws and regulations. Some of these offerings are based on independent third-party certifications and attestations, whereas others provide contract amendments and guidance documentation to help customers meet their own compliance obligations.

Each Azure Compliance offering across all of the above 4 segments is detailed at [Azure Compliance Offerings](#). It provides an up-to-date scope indicating which Azure customer-facing services are in the assessment, as well as links to downloadable resources to assist customers with their own compliance obligations. For select third-party assessments, **Appendices A and B list services in audit scope for Azure and Azure Government**, respectively.

Additional detailed information about Azure compliance offerings is available from the [Trust Center](#). Moreover, all downloadable documentation is available to Azure customers under a non-disclosure agreement from the [Service Trust Portal](#) in sections labeled:

- [Certifications, Regulation and Standards](#): which further provides links to FedRAMP, GRC Assessment, ISO, PCI DSS, and SOC reports sections;
- [Reports, Whitepapers and Artifacts](#): which further provides links to BCP and DR, FAQ and White Papers, Pen Test and Privacy and Data Protection sections;
- [Industry and regional Resources](#): which further provides links to Financial Services, Healthcare and Life Sciences, Media and Entertainment, United States Government (NIST), Regional Certification and Resources and Other Industries section.

Customers are wholly responsible for ensuring their own compliance with all applicable laws and regulations. The information provided in this document does not constitute legal advice, and customers should consult their legal advisors for any questions regarding regulatory compliance.

¹ For the Azure FedRAMP High, DoD SRG, and NIST CSF Scope please refer to [the following site](#).

² Azure Databricks SOC attestation includes SOC 1 Type 2, SOC 2 Type 2 and SOC 3 reports.

³ Service has only achieved the certificates listed in the table above, any other inherited scope references are not applicable.

⁴ Service operates under the same infrastructure that powers Microsoft Teams. As such, please refer to O365's compliance offerings that this service adheres with ([LINK](#)).

⁵ Certifications for edge devices (such as Azure Data Box and Azure Stack Edge) apply only to Azure online services component of the service which support on-premises, customer-managed devices.
